UK STATISTICAL DISCLOSURE CONTROL POLICY FOR 2011 CENSUS

The attached paper PAMS (06) 23a sets out the policy position on Statistical Disclosure Control (SDC) that the Registrars General for Scotland, England and Wales and Northern Ireland have agreed.

GROS have been closely involved in working out the agreed position over recent months, and are content that this provides a basis which should allow an SDC policy acceptable to all parties to be applied in the 2011 Census.
