

Patient Information Leaflets

All Patient information leaflets need to clearly explain:

- the National Health Service Central Register for Scotland proposed involvement in the study
- named information will be sent to NHSCR system, for the purpose of follow-ups
- confidentiality and security agreements

We strongly advise you not to guarantee:

- information will not leave the hospital, surgery or research institution

Further guidance for wording on patient information leaflets can be found on the [National Research Ethics Service](#) web site.
